Concern about how I have been treated since February 2

To Human Resources,

I am a Water Treatment Operator II on the night shift at the water plant. I have worked for the City since March 10, 2025, and I have had no discipline.

On February 2, 2026, I told my supervisor, Dale Pruett, that I am pregnant. Since then I have been treated differently:

1. On February 16, I was removed from the Level III certification course. Kyle Benning, who holds the same job, was kept in the course. When I asked why, Mr. Pruett said there was "no point training someone who'll be gone." Ryan Mitchell was present.

2. The March overtime schedule, posted March 4, gives me no shifts. I averaged six overtime shifts a month from September through January.

I believe I am being treated this way because I am pregnant. I am asking the City to put me back in the certification course and to schedule overtime fairly.

Please confirm you received this email.
